**CALCULATION AND DISSEMINATION OF
INDUSTRIAL LABOUR INPUT INDICES ACCORDING TO NEW BASE YEAR**

In order to reflect the structural economic developments in indices, base years are updated in the years ending with "0" and "5" for industrial business statistics. Indices are calculated with new base year and methodologies. Therefore industrial business statistics with base year 2005=100 are recalculated with new base year 2010=100.

Due to this reason Industrial Production Index and Industrial Turnover Index with new base year was published earlier. Industrial Labour Input Indices consisting of Industrial Employment Index, Hours Worked Index in Industry and Gross Wages-Salaries Index in Industry are going to be published on 29 May 2013.

Announced to public with respect.
